

Storm Water Management Program

The University of Texas at Austin

Notification of Construction Activities

Construction: Any construction project regardless of size that disturbs soil, ground cover, or uses water (including pressure washing) that will be discharged onto or into soil or into a drain. Include indoor projects if there will be a staging area that is located outside on an unpaved surface. Small landscaping work performed by the grounds crew is exempt if it does not disturb new areas and follows the requirements.
